

Federico Bianco

Technical Advisor

Federico holds a Degree in Veterinary Medicine and a PhD in Endocrinology.

Since 2005 he works at Chiesi Farmaceutici SpA, having covered various roles always in neonatology and special care products.

During his journey in Chiesi he has worked 10 years in research and development as head of the preclinical pharmacology neonatology team and as project leader.

Federico's main areas of research have been aerosol delivery and other less invasive techniques for the administration of surfactant.

During his time in R&D he supported the Paolo Chiesi Foundation being part of the scientific board appointed to the evaluation of projects in neonatology.

In 2020 Federico joined the Global Medical Affairs Team as head of CARE coordinating a team of medical leads committed to different therapeutic areas: neonatology, transplant and critical care.

Since 2024, on top of his role in the CARE franchise he joined the Paolo Chiesi Foundation as technical advisor.
